RIVIERE Sophie

PORTFOLIO PROJECT
2017/2018

AFORMAC

1. Presentation of the website.

RIVIERE Sophie

This new project, this time a Portfolio, will allow us to create a site that will be a bit like a business card for our future professional life. It is therefore destined to evolve in the future.

In order to be able to easily realize this evolution to come, it is better to build it according to dynamic content thanks to Php.
According to our specifications, which will be attached to the project, we must find our personal information, our training and our skills for this beautiful world of the web. By putting them in the form of tables of data, we will be able to modify them as we progress.

The projects realized during our training at Aformac will be in the form of an illustration, with its title, the month and the year of realization, and a description of 3 lines.
A contact form will accompany the project so that the visitor can reach us and we will also store in a table of data, the collected information.

Finally to finish our figures imposed by the specifications, we will detail the Mockup of the front part and the back part. These, we will help build our MVC (Controllers Views Models) which will facilitate the writing of our site and its use in this new discovery of the Server Framework: Laravel.

AFORMAC

2. LE MOCKUP

The Front office

The Portfolio site will have 3 pages:

Home page

The visitor will be welcomed on a homepage, where he will find various creations, and a menu that will allow him to navigate the site.

Profile Page

The visitor can find on this page: my civil information, formation, and competences : a link to a CV, a summary of the training followed and finally the skills acquired.

Contact page

The visitor will be able to get in touch thanks to this form

The database

4 Tables will be needed to the database for this portfolio

In order to manage our 3 pages, we will need the following tables:

- A table of my civil information. His name: users.

  User_id, Name, First Name, Address, Postal Code, City, Mail, Phone, Date of Birth, Created_at, Udpate_at

- A table of technical skills. His name:skills

  Skill_id, Name, Level, Type, Created_at, Udpate_at

- At the table for formation. His name:studies

  Study_id, Name, Description, Date-start, Date-end, Organisme, Created_at, Udpate_at

- Table for collecting data from the contact form. His name: contacts

  Contact_id, Name, Mail, Contents, Created_at, Udpate_at
